M Series

Vertical Machining Center

MICROCUT linear way VMC is designed and built to meet the ever-increasing demands for powerful and reliable machines with high efficiency, high accuracy machining performance.

MICROCUT M series uses roller type linear guideways, a high-precision main spindle with thermal expansion stability and a robust and compact structure design with high durability. Depending on machining needs, various travel lengths with great capacity satisfy all demands.

M760

Rigid Construction

The tool magazine is assembled in structural ribs that are directly supported to the ground, thus increasing tool magazine size without compromising column rigidity.

Optimal Rigidity

The major structural component is made of Meehanite cast iron, which is heat treated to relieve stress, and to assure rigidity and accuracy.

Rib Enhancement

All casting is reinforced with heavy ribs to resist vibration. The base incorporates a durable ribbed box design for maximum structural loading.

Triangular Support Base

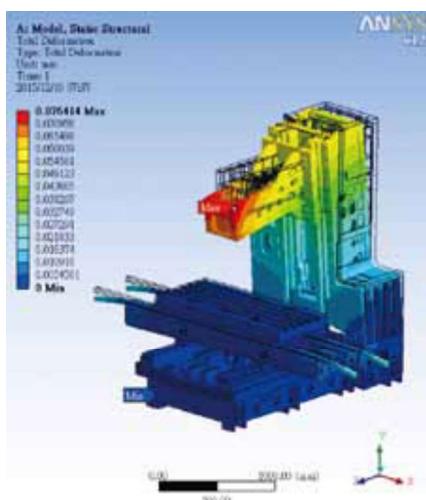

The triangular wide-distance foundation provides solid support for operation.

One-piece Design Headstock

Offering high stability and capacity for heavy duty cutting

Structural Optimization

All structural components and whole machine frame of M series are analyzed by ANSYS mechanical system and Finite Element Method (FEM) to ensure structural optimization.

M1050

Motion Control

① Ballscrew

C3 Class Pretensioned Ballscrew

Class C3 ballscrews are pretensioned on each axis to reduce heat deformation for high accuracy and repeatability.

Direct-coupled Servo Ballscrew Motor

Direct-coupled servo motor can enhance positioning accuracy and provide better contouring and threading.

② Guideway

High Precision Linear Guideways

Installed for all axes to ensure high load carrying capacity and rigidity with high running and positional accuracy as well as low friction.

2

3

M1600

Ball Type linear Guideway

M760

The recirculation ball guideways for each axis are preloaded to provide zero clearance between the moving surfaces. This increases rigidity in all directions while providing higher accuracy and reliability.

Roller Type Linear Guideway

M800/ M1050/ M1200/ M1400/ M1600/ M1600P

High rigidity steel on roller guideway provides high durability. Roller guideway on the three axes enables a fast feed rate of 30 m/min, ensuring smooth movement and accuracy.

4-guideway base to support saddle

M1400/M1600/M1600P

The bigger models of M series mount 4 linear guideways in the Y axis to ensure the maximum rigidity with high loading capacity

Spindle

M series is built with innovative machine concepts by using a wide range of high-performance spindles to present consistent precision performance and dynamic machining for various application.

Extensive options of spindle types and motor configuration are provided to meet industrial demands. The higher horsepower motors are also available to optimize the strength of machine for ultimate machining performance.

- **Belt Drive spindle**

The standard 10,000 rpm belt drive spindle with ISO 40 taper.

- **In-line spindle (Opt)**

The powerful direct drive of 12,000 and 15,000 rpm spindles with ISO 40 taper ensure high machining performances.

Spindle Dynamic Balancing

The online dynamic balancing instrument offers calibration for spindle displacement, speed and acceleration of full speed range

High rigidity Spindle

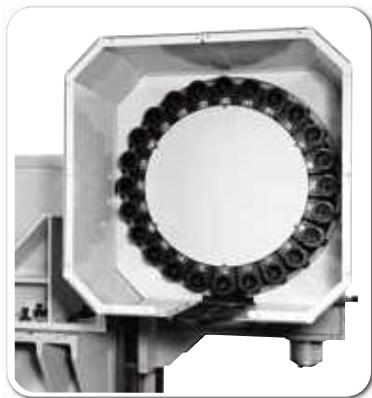

With preloaded angular-contact bearings throughout and with a large spacer between front bearings to improve radial thrust capacity. Cartridge spindle design makes maintenance easy.

Spindle oil cooler (opt)

All machines are available to equip with spindle oil cooler to prevent thermal expansion effects and thermal deformation, allowing high accuracy machining, perfect finish and long lifetime of spindle as well.

Tool Management

24T Arm type ATC

40T chain type ATC

Fast and Reliable

Arm type ATC

Providing stable and quicker tool selection

It is activated by electric motor and driven by cam mechanism. The bi-direction tool selection is controlled by PLC software for quicker tool selection to reduce non-cutting time.

Standard

Random arm type 24 Tools - all series

Optional

Carrousel type 16 Tools - M760

Random drum type 30 Tools - all series

**Random chain type 40 Tools - M1050, M1200,
M1400, M1600
M1600P**

Tool selection panel

40 tool chain type magazine is accessible from back of machine for easy loading and unloading of tools while machine automatic operation.

Coolant Through Spindle (opt)

Coolant through spindle uses high pressure pump to supply coolant through tool, cooling the cutting edge directly. This clears chips during deep-hole and tapping, increases tool life and allows higher cutting speeds.

CTS system options:

- CTS 20 bar built-in type
- CTS 20 bar separate type
- CTS 20 bar separate type with paper filter
- CTS 70 bar programmable separate type with paper filter

CTS 20 bar built-in type

CTS 20 bar separate type

CTS 20 bar separate type with paper filter

Auxiliary Coolant Filter

Individual CTS tank is supplied with a re-usable 25-micron iron filter. Built-in system provides 25-micron filter. Both filters take away contamination and particles from the coolant before coolant is recycled through the coolant pump.

Chip Removal

- Efficient Free-flow enclosure guard design
- Efficient chip conveyor carries out chips to save operation time
- Drainage outlet design
- Multiple chip flush solution offers easy chip clean
 - Rear wash down with high pressure pumps(opt)
 - Spindle with coolant nozzle

Control

FANUC 0iMF CONTROL

- High reliable
- High-speed, high-precision and high-quality machining with AI contour control
- Machining condition selection function
- Enriched basic functions: rigid tapping, tool life management
- Advanced digital servo technology
- User friendly operation: Program editing, memory card, data server

Excellent Operation

Integration operation & programming guidance with extremely simplified operations

FANUC MANUAL GUIDE 0i (std)

Integrated operation guidance for NC program

FANUC MANUAL GUIDE i (opt)

- Programming guidance
- With extremely simplified operations

MITSUBISHI M80H CONTROL

- Panel-in type, a control unit with integrated display
- Windows-less display provides easy operability
- A touchscreen display as standard
- Smartphone-like intuitive touch operation
- View 3D model at any desired size for 3D graphic check, supporting both turning and milling

FAGOR 8065/8055 CONTROL

- High speed machining, large look-ahead buffer and a high speed block processing time
- Graphically assisted set up user interfaces
- Preparation help on tool management
- Various programming languages provide improved operator ease & efficiency:
 - Wide range of ICON conversational cycles
 - ISO code languages

HEIDENHAIN iTNC 620 CONTROL

- Minimize setup times
- Graphic support in any situation
- Straight forward function keys for complex contours
- Programming contours unconventionally
- Field-proven cycles for recurring operations
- Smar T.NC the alternative operating mode
- Program off line
- Fast data transfer
- The iTNC programming station
- Setup, presetting and measuring with touch trigger

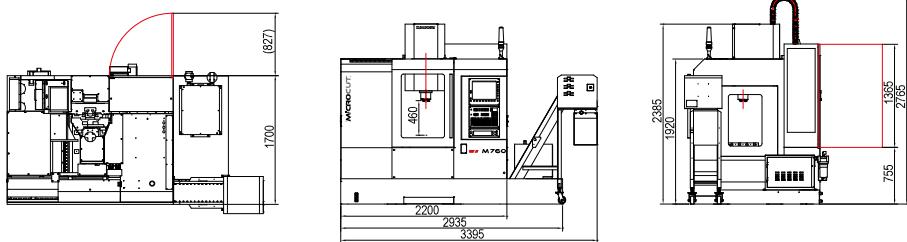

SIEMENS SINUMERIK 828D CONTROL

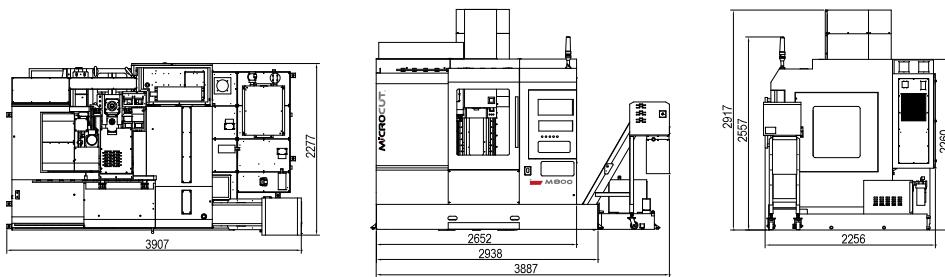

- Easy data exchange thanks to USB, CF and Ethernet interfaces on the panel
- ShopMill machining step programming
- SINUMERIK CNC programming language with high-level elements and program guide
- Online ISO dialect interpreter: maximum CNC program compatibility
- Advanced Surface: Innovative, high-performance CNC functions
- Animated Elements: Optimized operator guidance
- Easy input of pictographic languages directly via the CNC keyboard
- Easy Message: Integrated mobile radio modem for optimum process monitoring via mobile telephone.

Standard Accessories

- Belt drive spindle 10000 rpm
- Arm type 24T tool capacity - M760, M800, M1050, M1200, M1400, M1600
- Arm type 30T tool capacity - M1600P
- Roof with door opening for overhead crane
- C3 class precision ground ballscrew
- Linear guideway
- Automatic lubrication with low lubrication fault
- Coolant system
- Telescopic guideway covers
- Low voltage circuit system
- Chain type chip conveyor
- Rear wash down device
- CE standard electrical control system
- Fully enclosure with slide door
- Rigid tapping function
- EMC and Safety module
- CE-marking declaration
- Heat exchanger
- 4th axis preparation

Optional Accessories

- In-line spindle 12000/15000 rpm
- Chip bucket
- Air conditioner
- Coolant gun
- Oil skimmer
- 4th axis
- CTS 20 bar built-in type
- CTS 20 bar separate type
- CTS 20 bar separate type with paper filter
- CTS 70 bar programmable separate type with paper filter

- Tool setting probe
- Workpiece probe
- Three axes with linear scales
- Carrousel type 16T tool capacity - M760
- Random drum type 30T tool capacity - M760, M800, M1050, M1200, M1400, M1600
- Random chain type 40T tool capacity - M1050, M1200, M1400, M1600,M1600P
- 3-color lamp of cycle finish
- Transformer for 380V~440V
