Vertical Machining Center

MICROCUT box way vertical machining center are high-quality machine tool designed to achieve maximum productivity and performance with wide applications for molding industry, automobile industry and general workshops. The machine structure is designed with FMEA to ensure durability and consistency, featuring high level of rigidity and enabling an unsurpassed performance in heavyduty cutting. All aspects of the machine including controller, motion control, coolant collection, chip removing and maintenance service are well designed for easy operation. VMC series provides high performance and making it the best investment long-term.

VM-1000	XYZ: 1000x600x600mm	ISO40 taper spindle
VMC-1100	XYZ: 1100x710x710mm	ISO40 or ISO50 taper spindle
VMC-1300	XYZ: 1300x710x710mm	ISO40 or ISO50 taper spindle
VMC-1600F	XYZ: 1600x800x710mm	ISO40 or ISO50 taper spindle
VMC-1600	XYZ: 1600x900x850mm	ISO40 or ISO50 taper spindle
VMC-2100	XYZ: 2100x900x850mm	ISO40 or ISO50 taper spindle
VMC-3100	XYZ: 3100x900x850mm	ISO40 or ISO50 taper spindle

VMC-1600

VMC-1600F

VMC-2100

Rigid structure

- The major structural components are made of Meehanite cast iron and heat treated to relieve stress thereby assuring maximum rigidity and accuracy.
- Triangulate wide-stance base incorporates a durable ribbed box design for maximum structural loading.
- All castings are reinforced with heavy ribs to resist flex and damp vibrations.
- Hardened and precision ground ways on the 3 main axes. Way bearing surface are plated with Turcite B for smooth and stable movement.

VMC-3100 frame

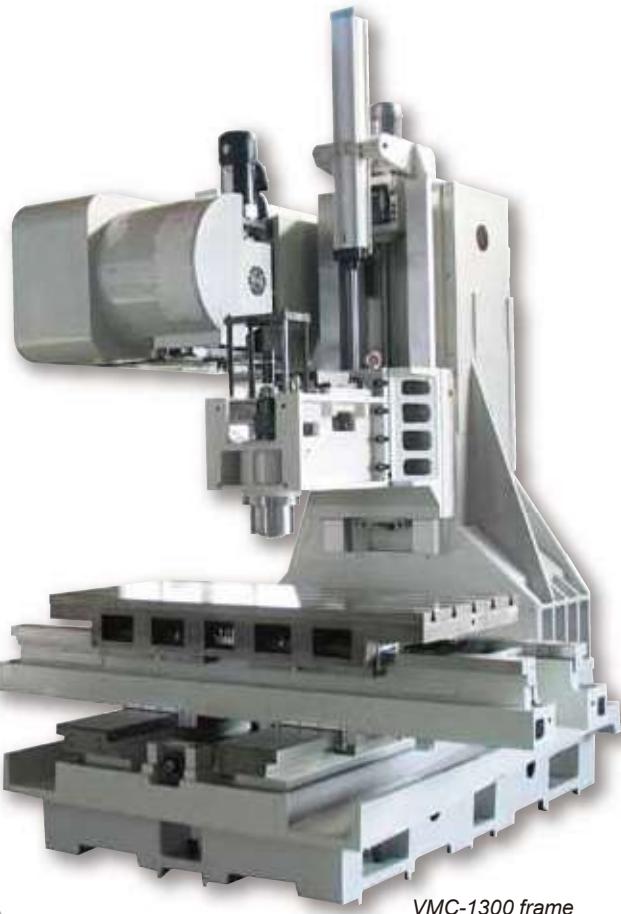

Pneumatic Counter Weight on VMC-1100/1300/1600F

Close circuit pneumatic counter weight system with air tank provides excellent performance. Stable movement eases vibration for high speed vertical rapid traverse.

Mechanical Counter Weight on VM-1000/VMC-1600/2100

Larger machine requires a mechanical counter weight for heavy balancing. Thus on VMC-1600/2100 a wide column and big mechanical counter weight is provided ensures an excellent balancing.

VMC-1300 frame

Column & Saddle

- Trapezoidal shaped column ensures no damp and vibration during machining to provide high machining accuracy.
- Enhanced saddle and fully supported workpiece structure contribute to the ability for heavy duty machining.
- Craftsmanship in hand scrapping ensures high quality and attention to detail in manufacturing process.

Y-axis Guideways

Extremely wide guideways on all series of products.

- Four guideways on VMC-1600F VMC-1600 VMC-2100
- Six guideways on VMC-3100
- Two guideways on VM-1000 VMC-1100 VMC-1300

Double-Anchored Ballscrew

Large diameter ballscrew anchored at both ends for parallelism to the axis guides. High precision class ballscrew with pre-tensioned to eliminate backlash.

Direct-Coupled Axes Motors

Direct-mounted servo motors improve positioning accuracy and provide better contouring and threading.

VMC-1600/2100 frame

Spindle

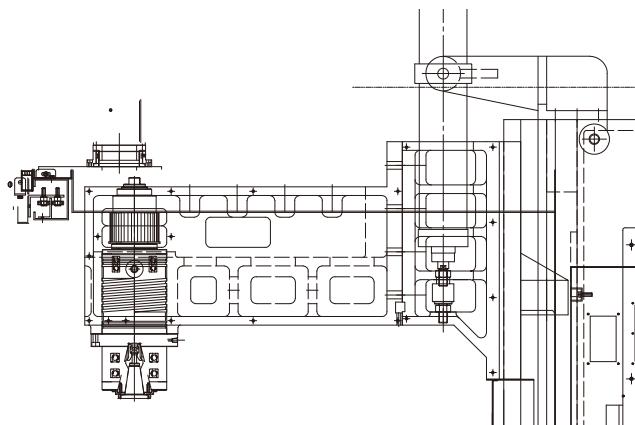

Spindle Dynamic Balancing

The on line dynamic balancing instrument calibrates the spindle displacement, speed, and acceleration of the full speed range.

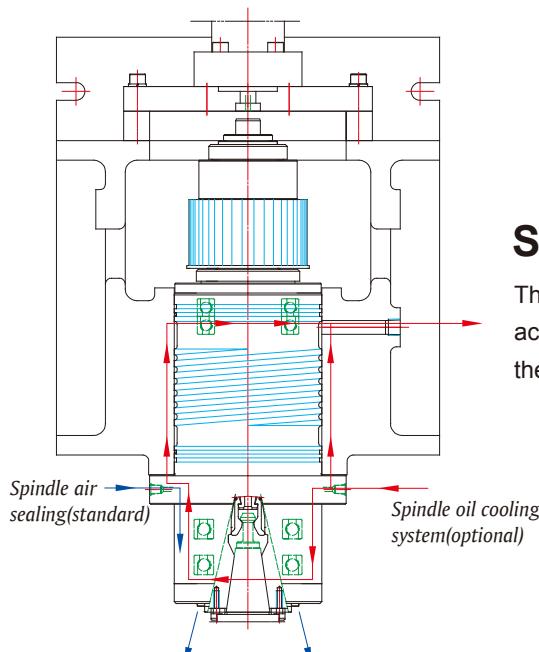

High Capacity Cartridge Spindle

With preloaded angular-contact bearings throughout and with a large spacer between front bearings to improve radial thrust capacity. Cartridge spindle design for easy maintenance.

One-Piece Design Headstock

Offers high stability and capacity for heavy duty cutting.

Spindle Oil Cooler

The cooling system assures spindle accuracy permanently and extends the service life of spindle.

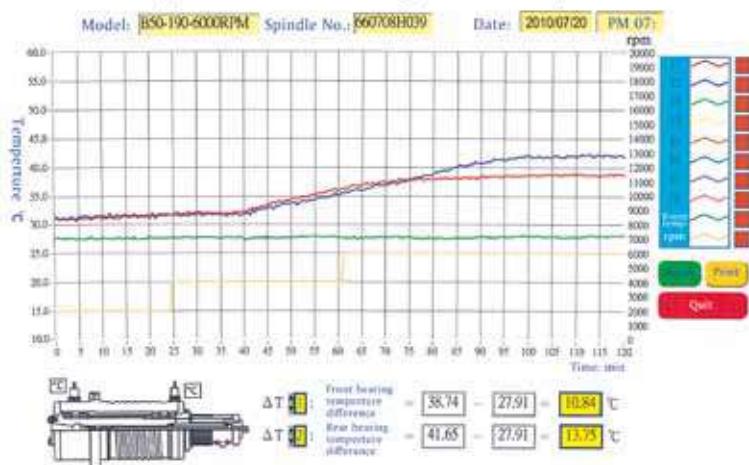

Thermal Reduction Design

Geared Head for ISO 50 Taper

- With maximum 6000rpm spindle speed by ISO50 spindle.
- Two-step gear ratio 1.1:1 4.4:1.
- Geared box is dynamic balanced by testing run on inspection table before assembly.

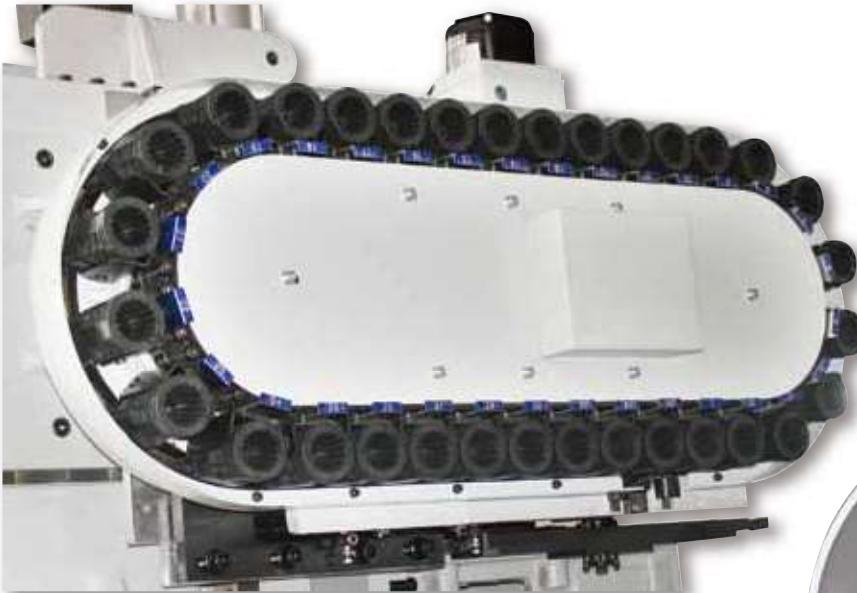

Spindle Running Test Report

Spindle Temperature Tracing

Each spindle is well tested before assembled on machine. Two-hour temperature running trace is recorded to confirm the thermal expansion stability.

Tool Management

ATC for VMC-1300 ISO40, 32 tools

ATC for VM-1000 ISO40, 24 tools

The fast, simple and long-life automatic tool changer provides stable and reliable tool changer.

- The innovative cam driven mechanism results in the unique ATC. The bi-directional tool selection is achieved by PLC software programming (random).
- The cam driven tool magazine ensures rotation accuracy, and smooth motion while full tools loading.
- ISO 40: 24 tools for VM-1000/VMC-1100, 32 tools for VMC-1300, 40 tools for VMC-1600/2100
- ISO 50: 32 tools for VMC-1100/1300/1600/2100
- ISO 50: 24 tools for VMC-1100/1300/1600/2100 on request

ATC for VMC-1600/2100 ISO50, 32 tools

Chip Management

- Efficient free-flow enclosure design
- Efficient chip conveyor carries out chips to save operation time (opt.)
- Multiple chip flash solution offers easy chip clean.
 - Rear wash down with high pressure pumps (opt.)
 - Top wash down (opt.)

High Pressure Coolant Through Spindle

Coolant through spindle uses high pressure pump to supply coolant through tool, cooling the cutting edge directly. This clears chips during deep-hole drilling and tapping, increases tool life and allows higher cutting speeds. Two systems are available, one provides individual CTS tank with 600L big capacity and 20 bar or 70 bar high pressure pump are available for selection. The other provides 20 bar high pressure pump built-in with machine major coolant tank which requires less floor space. Both systems include the auxiliary coolant filter.

Auxiliary Coolant Filter

Individual CTS tank is supplied with an iron filters 25-micron which is re-usable. Built-in system provides 40-micron filter. Both filters take away contamination and particles from the coolant before coolant is recycled through the coolant pump.

Control

FANUC CONTROL

FANUC 0iMF CONTROL (31iMB on request)

- High reliable
- High speed, high-precision, high-quality machining with AI contour control and NANO interpolation
- Machining condition selection function
- Enriched basic functions: Rigid tapping, Tool life management
- Advanced digital servo technology
- User friendly operation: Program Editing, Memory Card, Data server

Excellent Operations

Integrated Operation & Programming Guidance with extremely simplified operations

FANUC MANUAL GUIDE i.....

- Programming Guidance
- With extremely simplified operations

FANUC MANUAL GUIDE 0i.....

Integrated Operation Guidance for NC program

ICON conversational language

FAGOR CONTROL

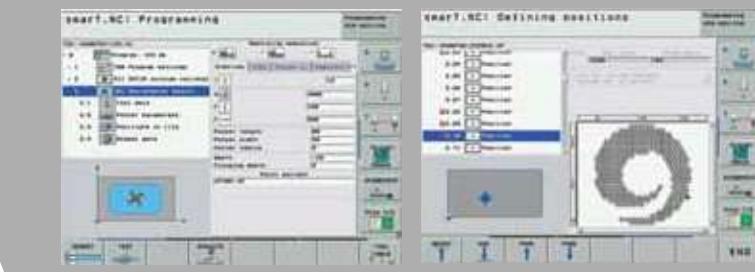

FAGOR 8055 POWER CONTROL

- High speed machining, large look-ahead buffer (200 blocks) and a high speed block processing time (capable of up to 1 millisecond).
- Graphically assisted set up user interfaces
- Preparation help on tool management
- Various programming language provides improved operator ease & efficiency:
 - Wide range of ICON conversational cycles
 - ISO-code language

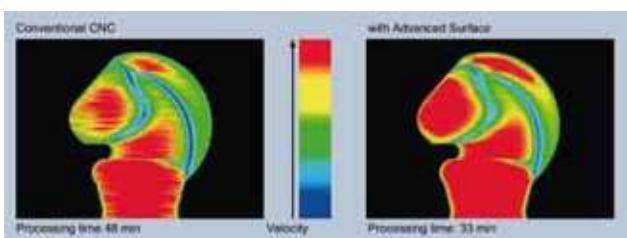

HEIDENHAIN iTNC530 HSCI CONTROL

- Minimize setup times
- Graphic support in any situation
- Straight forward function keys for complex contours
- Programming contours unconventionally
- Field-proven cycles for recurring operations
- SmarT.NC—the alternative operating mode
- The iTNC 530 understands DXF files
- Program off line
- Fast data transfer
- With Windows 7
- The iTNC programming station
- Setup, presetting and measuring with touch trigger

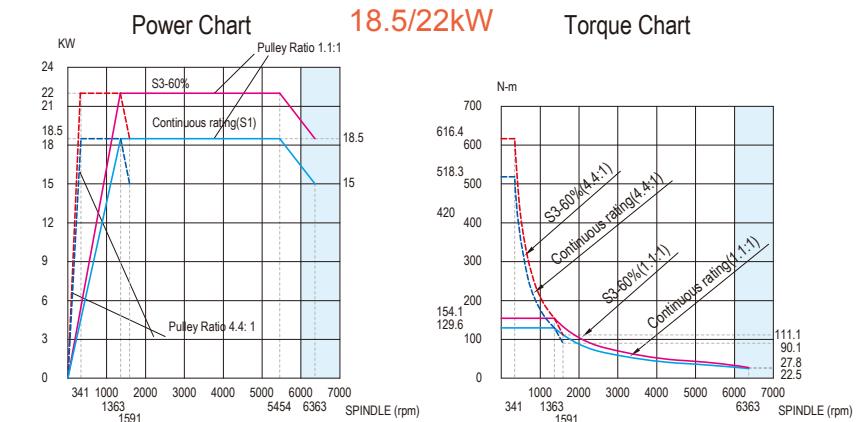

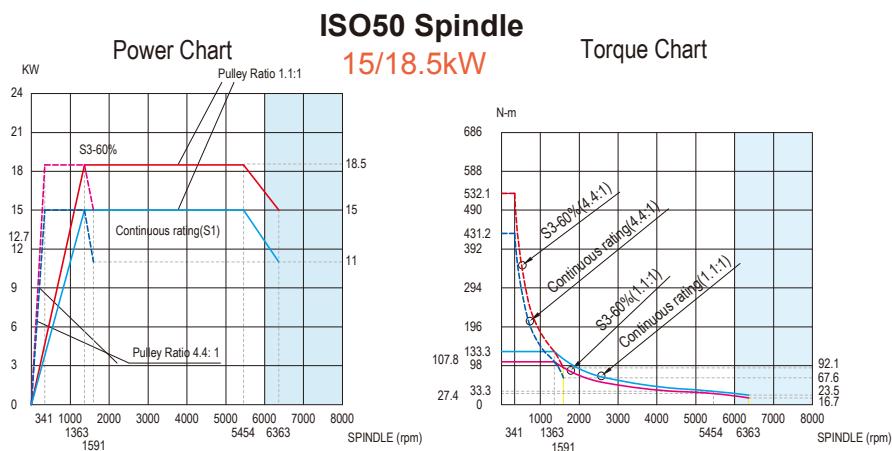

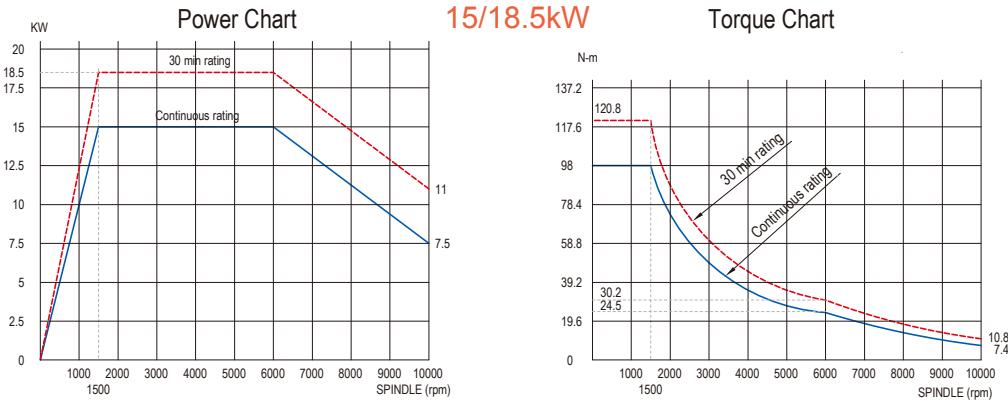

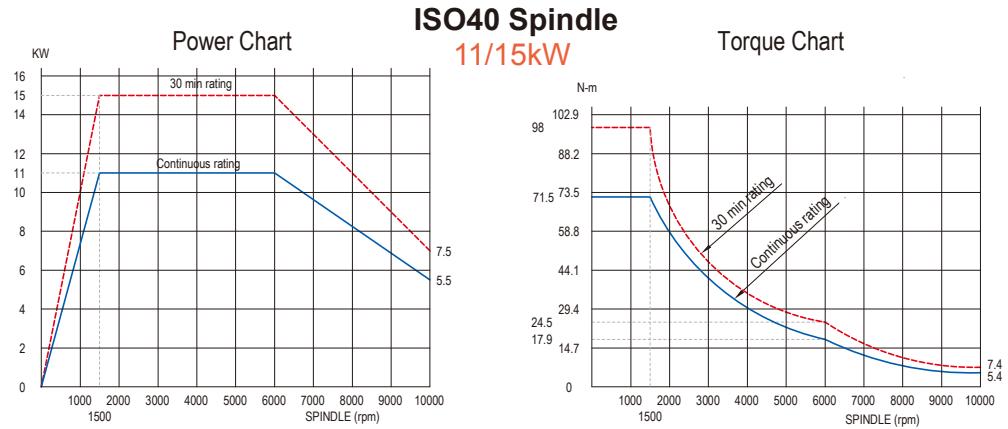

SIEMENS CONTROL SIEMENS SINUMERIK 828D CONTROL

- On the control panel, USB, CF, and Ethernet interfaces for data exchange at ease.
- ShopMill machining-step programming
- SINUMERIK CNC programming language with high-level elements and programGUIDE
- Online ISO dialect interpreter: maximum CNC program compatibility
- Advanced Surface: Innovative, high-performance CNC functions
- Animated Elements: Optimized operator guidance
- Easy input of pictographic languages directly via the CNC keyboard
- Easy Message: Integrated mobile radio modem for optimum process monitoring via mobile telephone

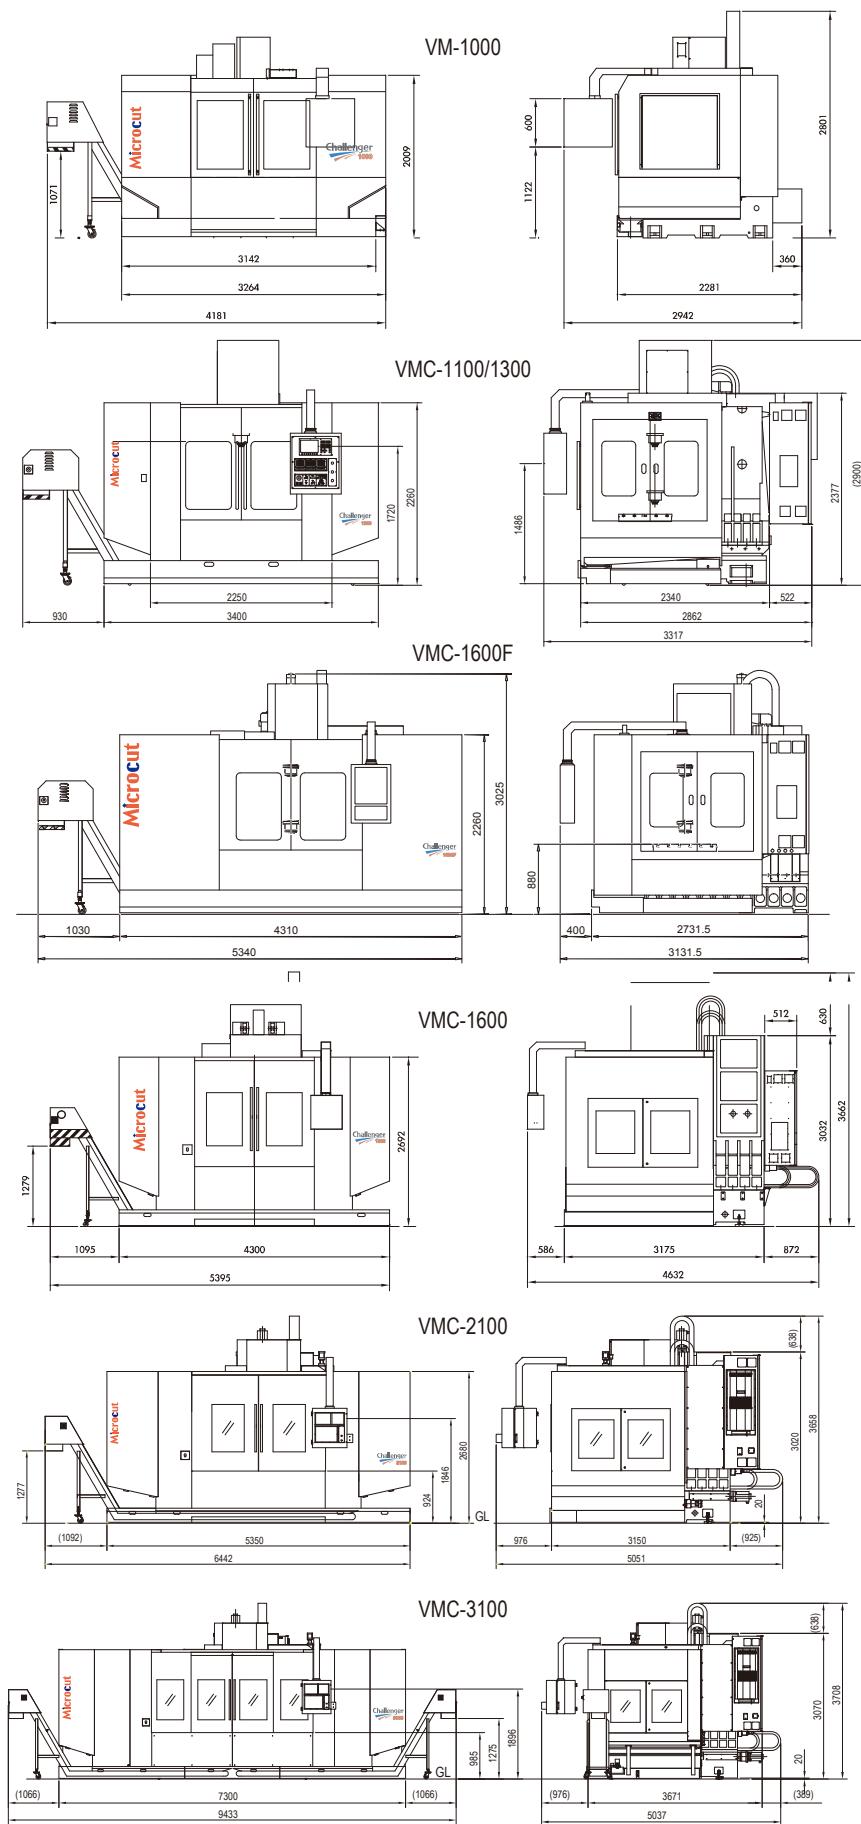

VM / VMC SERIES Power & Torque Chart

Standard Features

- CNC control
- Z axis with upgraded motor & built-in brake
- High speed precision spindle at 10000rpm For ISO40, 6000rpm for ISO50 with spindle oil cooler
- Rigid tapping function
- Arm type ATC
- Box sliding way for axes
- Telescopic covers for X & Y axes
- Fully enclosed splash guard with interlock device
- Enlarged coolant tank & chip pan
- Automatic lubrication system
- Work light
- Portable MPG
- Leveling pads & bolts for installation
- Tool box & kits
- CE declaration of conformity for EU countries
- Instruction manual & parts list
- Lamp of cycle finish and alarm
- Heat exchanger

Optional Features

- Enlarge spindle motor
- Coolant through spindle with high pressure pump
- Wash down device
- Chip conveyor & bucket
- Air conditioner
- EMC
- 4th axis rotary table
- 4th/5th axis rotary table
- Oil skimmer
- Spindle oil cooler for #40
- Tool setting probe
- Workpiece measuring probe
- Special machine color on request
- Safety module
